

CLINICAL PROOF

How do we know it works? We have set the bar for the highest clinical study standards in the physician-strength skin care market. All Epionce studies are performed by nationally recognized independent research organizations and adhere to the highest standards for clinical studies using the finished, market-ready product. Epionce clinical studies are only performed on human volunteers, and do not utilize animal testing. The data from the studies are then peer reviewed and published at medical conferences and in scientific journals. Epionce products have been clinically tested against leading products to provide a visible improvement of:

- Fine lines and wrinkles
- Uneven spots and discoloration
- Rough and uneven texture
- Dry and scaly skin
- Blemished and problem skin
- Clarity and radiance

Our philosophy is simple: healthy skin is beautiful skin. The unique Epionce approach paired with industry-leading clinical proof has been trusted by physicians for over fifteen years.

What are you waiting for? **Get healthy, beautiful skin starting today.**
